

An Innovative New Flooring Insulation System

"We create high quality materials for innovative sustainable insulation solutions that ignite current & future generations to thrive"

AEROMIX SHP

The best insulating EPS cement-bonded floor insulation system in the world. It has an insulation value of 0.037 W/mK u.i. and is certified by European Assessment ETA 21/0579 of 19/10/2021

Composite insulation layer that consists of a mixture of 3 different components. It is known in the industry as the best insulating EPS flooring system in the world.

PRODUCT FEATURES

- Thermal conductivity (λ) : 0,037 W/m²K
- Sound reduction : 19 dB
- Compr. Strengh : 137 kPa at 6,6%
- Density : 93 kg / m³
- Installation : 950 m² / day
- CO2 : 80 Kg / m³
- Drying time / accessibility : 3 – 5 days

ADVANTAGES

- Ideal for underfloor heating and tacker situations
- Easy to apply and level
- Ecological, low cement consumption
- Improve strength in the early stages
- Increase the workability
- Improve the stability of the aggregates and flow
- Reduce segregation, bleeding and cracks
- Reduce the sagging flow

SERVICES

Vertical integration

All our products originate from a waste raw material that we transform in a highly performing finished product.

Superior products

Our products outperform on technical, ecological, operational and economical field to create a better solutions for the industry.

Trustworthy distribution network

We only work with authorized distributors and installers that are highly experienced and trained in our field.
